WE-EF - Vietnam Veterans Commemorative Wall

Located in the central Victorian town of Seymour, the Vietnam Veterans Commemorative Walk is a permanent tribute to all 60,267 Australians who participated in the Vietnam War from 1962 to 1973. Melbourne practices **Sinatra Murphy Pty Ltd** and **AQL Landscape Design** were appointed by the Commemorative Wall Committee to transform the 85 metre wall into a meaningful visual, story-telling monument.

Consulting engineers **AHW Waterman** and **Gardens at Night Landscape Lighting Professionals** worked closely with the landscape designers and the committee to deliver a lighting installation that converts the beautiful glass-wall into a glowing beacon at night time. WE-EF ETT130 29W LED Linear Wallwashers were specified by the engineers to back-light the 108 toughened glass panels, each of which displays photographic images against the names of Australian participants in the war conflict. The result is a timeless edifice that adds a powerful landmark to the township's landscape.

The asymmetrical wall-wash light distribution of the ETT permits wide spacing between luminaires, while the luminaire's optimal CRI displays the true colours of the high resolution photographic images at night.

Megabay - Virgin Lounge Façade Lighting

Standing next to Melbourne's Tullamarine Airport is a newly constructed building accommodates the new Virgin Australia VIP Lounge. The eye-catching, glowing box is the design work of **Bates Smart Architects** with the technical advice and coordination provided by lighting professionals **Electrolight** in Melbourne.

The lighting designers specified the Megabay Viento LED 100W RGBW linear projectors with narrow beam distribution to create the rich purple hue that symbolises the airline's brand colour scheme. The luminaires are installed on the roof in between the double-skin facade structure to project the coloured light from top to bottom.

New ERCO Pantrac LED Wall Luminaire

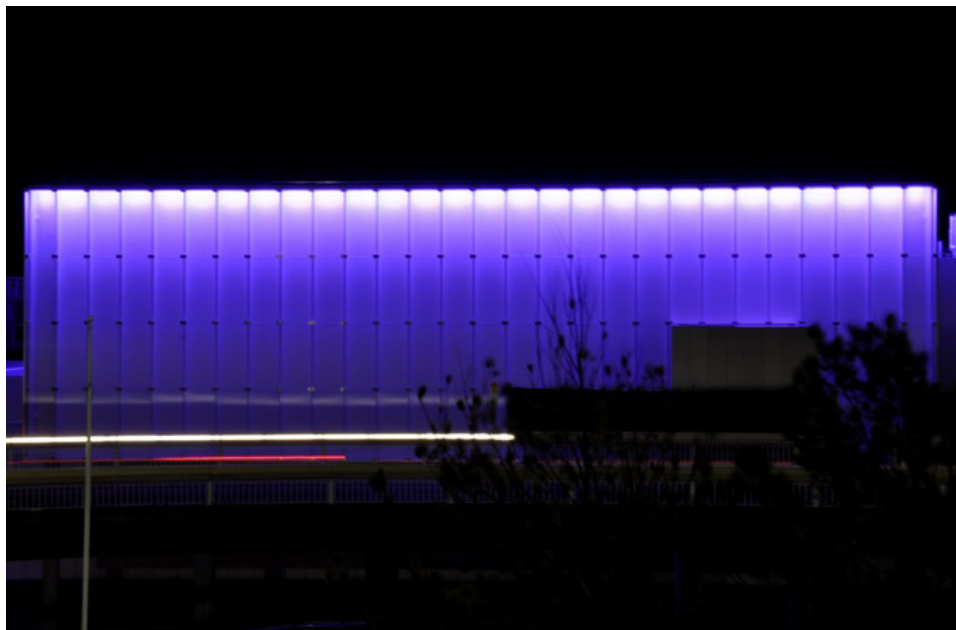

This ceiling washlight makes the task of creating uniform uplighting incredibly easy. Pantrac wall-mounted luminaires focus on adding lighting effects to ceilings. Their compact size make them an unobtrusive element in any space.

New Trilux Mirona QL LED

The Mirona QL LED was designed as a lighting solution for especially high halls and special requirements. The luminaire ensures optimal visual conditions with pleasantly glare-free and homogeneous light as well as high light output. At the same time the high-bay luminaire is highly economic – almost 50 % of energy costs can be saved compared to standard lighting systems.
