ERCO - 75 Dorcas Street, South Melbourne

Located on the fringe of the Melbourne CBD, 75 Dorcas Street is an A Grade office building currently leased by ANZ and BMW. Refurbishment works are currently taking place to upgrade the main entry and foyer, this also includes the amenities and lobby areas throughout all levels of the building. **Metier 3** architects and interior designers, together with engineers at **Cundall** worked on the design of an impressive green wall system for the ground level foyer.

The engineers worked closely with **Fytogreen** to deliver the beautiful architectural green wall. ERCO Optec Spotlights in 70W and 150W MH were selected to illuminate the vertical garden and achieve compliance by reaching the minimum 3000 lux required by green wall standards. The Optecs were specified with flood and wide flood Spherolit reflectors to increase the lighting output efficiency and management. The black colour finish of the track and luminaires allows for their easy integration within the contemporary and elegant corporate space, while the spherolit technology creates focus over the living wall without distracting or discomfort glare.

To create some accent lighting over the seating benches, Cundall specified the ERCO Quintessence recessed spotlight in 8W with a very narrow beam distribution. The luminaires add some contrast and definition to the general ambient light in the space.

ERCO - Top3 by Design, Emporium Melbourne

Australian design store Top3 by Design is one of the many high-end retail stores that opened a new establishment at the prestigious Emporium Melbourne.

Top3's exclusive and colourful merchandise is illuminated with ERCO Light Board 12W LED spotlights and wallwashers. The luminaire's striking compact design includes a flat housing with integrated control gear. They appear unobtrusive to direct focus onto the light. The spotlights create the focal glow in the room by emphasising the products precisely in brilliant colours. The wallwashers bathe both sides of the store in light to increase the ambient luminescence provided by the recessed linear luminaire profiles.

New Trilux Lesima LED Pendant

Even from a distance, it's impossible to overlook the Trilux LESIMA's individual design and decorative accents. The luminaire shades are available in a variety of shapes, sizes and materials, and provide in-room orientation through their specific decorative elements and translucent light patterns. In addition to an appearance that sets just the right mood, LESIMA high-lights merchandise in a targeted, powerful manner.

Megabay Osirion LED Inground & Wall Light

Engineered to exceed specifications, the Osirion will withstand continual high volume pedestrian traffic, resist corrosive coastal environments and endure aggressive mineral enriched soils.

The desirable effect of infloor uplighting is now feasible as LEDs operate at lower temperatures compatible with materials like carpet, vinyl and timber. The result - freedom of both interior and exterior lighting design.
